Professional Summary

Frontend-Focused Full Stack Developer with strong expertise in Angular , React, and Next.js, combined with backend development using Node.js and NestJS (TypeScript).
Experienced in building scalable, production-grade web applications with modular architecture, optimized performance, and clean code practices. Skilled in designing RESTful APIs, authentication systems, and role-based access control.
Actively expanding backend expertise into .NET (C#) to build high-performance, enterprise-level services.
Proven ability to deliver complete applications independently, collaborate in remote environments, and maintain high code quality across full-stack systems.

Technical Skills

Languages: JavaScript, TypeScript, C# (basic), SQL
Frontend: Angular , React (TypeScript), Next.js, Ionic, Tailwind CSS, Bootstrap
Backend: Node.js, NestJS, Express.js, ASP.NET Core , REST APIs
Databases: MongoDB, MySQL, Firebase (Firestore)
Tools & DevOps: Git, GitHub, Docker (basic), CI/CD, Postman
Concepts: Microservices, Authentication & Authorization, RBAC, API Design, Performance Optimization

Professional Experience

Full Stack Developer — Techno Verse *2023 – Present*

- Developed scalable web applications using Angular and React with a strong focus on performance, modular architecture, and maintainability.
- Implemented backend services using Node.js and NestJS, including authentication systems, role-based access control, and REST APIs.
- Optimized frontend performance through lazy loading, efficient state management, and reduced bundle sizes.
- Collaborated in structured workflows using Git, code reviews, and CI/CD pipelines.

Freelance Full Stack Developer — Remote *2019 – 2022*

- Built multiple client applications including admin panels, dashboards, and CRUD platforms.
- Implemented Firebase authentication, Firestore databases, and real-time data handling.
- Delivered end-to-end solutions by gathering requirements and managing full project lifecycle.

IT Administrator — Police Department *2018 – 2020*

- Designed and maintained an online attendance management system.
- Performed system monitoring, data validation, and maintenance.

Education

Master of Computer Science (MCS) *Virtual University, Lahore*
Bachelor of Computer Science (BCS – Math & CS) *University of Sargodha*

Core Strengths

- Strong problem-solving and debugging skills
- Experience working with remote teams and clients
- Clean, maintainable, and scalable code practices
- Continuous learner focused on backend scalability and modern architectures

Current Focus

- Backend development with .NET (C#)
- Microservices architecture and scalable system design
- Advanced API design and performance optimization

Selected Projects

Metallix Platform (Frontend & Backend) *2024 – 2025*
Angular, Node.js, NestJS, MongoDB

- Architected and developed a full-stack enterprise application with Angular frontend and NestJS backend.
- Designed scalable REST APIs with authentication, RBAC, and modular service architecture.
- Applied clean architecture principles for maintainability and extensibility.
- Optimized performance and built reusable UI components.

Frontend Repo — Backend Repo

School Management System *2023 – 2024*
Next.js, Node.js, Express.js, MySQL

- Developed a complete school management system with student records and attendance tracking.
- Designed backend APIs and database schema for efficient data handling.
- Implemented secure authentication and role-based authorization.

Project Repository

E-Commerce & Shopping Platforms *2022 – 2024*
Angular, Firebase, Node.js

- Developed e-commerce platforms with product listings, cart, and order workflows.
- Integrated Firebase authentication and Firestore database.
- Focused on responsive UI and performance optimization.

E-Commerce Repo — Shopping Repo

Doctor Appointment & Medical Applications *2022 – 2023*
Angular, Ionic, Firebase

- Developed web and mobile applications for appointment scheduling.
- Implemented authentication and real-time data updates.
- Built cross-platform UI using Ionic.

Web App Repo — Mobile App Repo

Games & Interactive Applications *2022 – 2023*
JavaScript, HTML5, CSS3

- Developed browser-based games to strengthen logic and UI handling.
- Focused on performance and responsive layouts.

2048 Game Repo
